

Level 1 Statistics

Level 1 relates to people visiting the Centre to access services during 2007. In total we recorded 3,337 visits over the year, and an average of about 20 'new faces' each month.

Level 2 statistics

Level 2 details what we provided in practical terms for people who asked for our assistance – not including meals. You'll see that the majority needed *Megabites* (594), followed by showers (205). We supplied 173 people with clothing, served 134 breakfasts and gave away 4 tents!

Client support

Level 3 is where the real work starts – engaging with our clients to help them resolve issues and problems. Most of this is advice or help filling in forms, maybe a phone call or perhaps a letter for them. Simple things often, but they can make a huge difference as our testimonials bear witness.

And the figures? Here they are:
